

THE BRITISH BLACKBURN FIGHTER-DIVE BOMBER

This plane, a two-seat fighter and dive-bomber, is one of Britain's latest additions to its fleet air-arm. It is similar in design

to the "Defiant," so deadly to the enemy: embodying the power-driven four-gun turret to the rear of the pilot. One of

the features is the retractable turtle backs, streamlining the gun turret. Retracted, they allow a wide arc of fire.
