

SCALE VIEWS BY JEFFERIES

Working from a 100-gallon fuel tank, this heavy-duty long-range fighter is capable of superior performance. Designed to carry a gross weight as well as a variety of other armament including guided missiles, it made its first flight in November 1953 and has since been ordered in quantities of 1,000. The F-100 is a supersonic, turbojet-powered fighter with a maximum speed of 1,050 mph. It has a range of over 2,000 miles and a service ceiling of over 50,000 feet. The F-100 is the only fighter in the world that has a built-in fuel tank and a retractable landing gear. It is also the only fighter in the world that has a built-in fuel tank and a retractable landing gear.
