

# NORTH AMERICAN F-100

■ USAF first fighter capable of supersonic speed in level flight. Super Sabre is direct descendant of famous F-86 series. It incorporates all latest aerodynamic improvements and electronic devices. Features sharply swept back, very thin wings, solid stabilizer located low on the rear of

fuselage and a parachute brake which reduces the plane's landing roll. Maximum speed is said to be in excess of 800 mph, with the result that some shock waves are continually produced during high speed flight. Powered by a P. & W. J57, 10,000 lbs thrust.
